A Word on Proactive Security

“

As leaders in cybersecurity, we have the ability and power to ensure our organizations' survival tomorrow, and decades from now - not by reacting to breaches, but through a proactive and methodical approach to mitigating cyber risk.

Logan Wolfe

Global CEO

Program Maturity Assessment

We'll start by performing a comprehensive assessment of the current state of your program across 17 categories, aligned with world-leading frameworks like NIST CSF, COBIT2019, ISO/IEC 27002 and ISF SOGP.

17 Categories

SG: Security Governance

5

IR: Information Risk Assessment

12

SM: Security Management

5

PM: People Management

6

IM: Information Management

4

PA: Physical Asset Management

8

131 Topics

SD: System Development

13

BA: Business Application Management

8

SA: System Access

10

SY: System Management

10

NC: Networks and Communications

10

SC: Supply Chain Management

10

TS: Technical Security Management

10

TM: Threat and Incident Management

9

LC: Local Environment Management

5

BC: Business Continuity

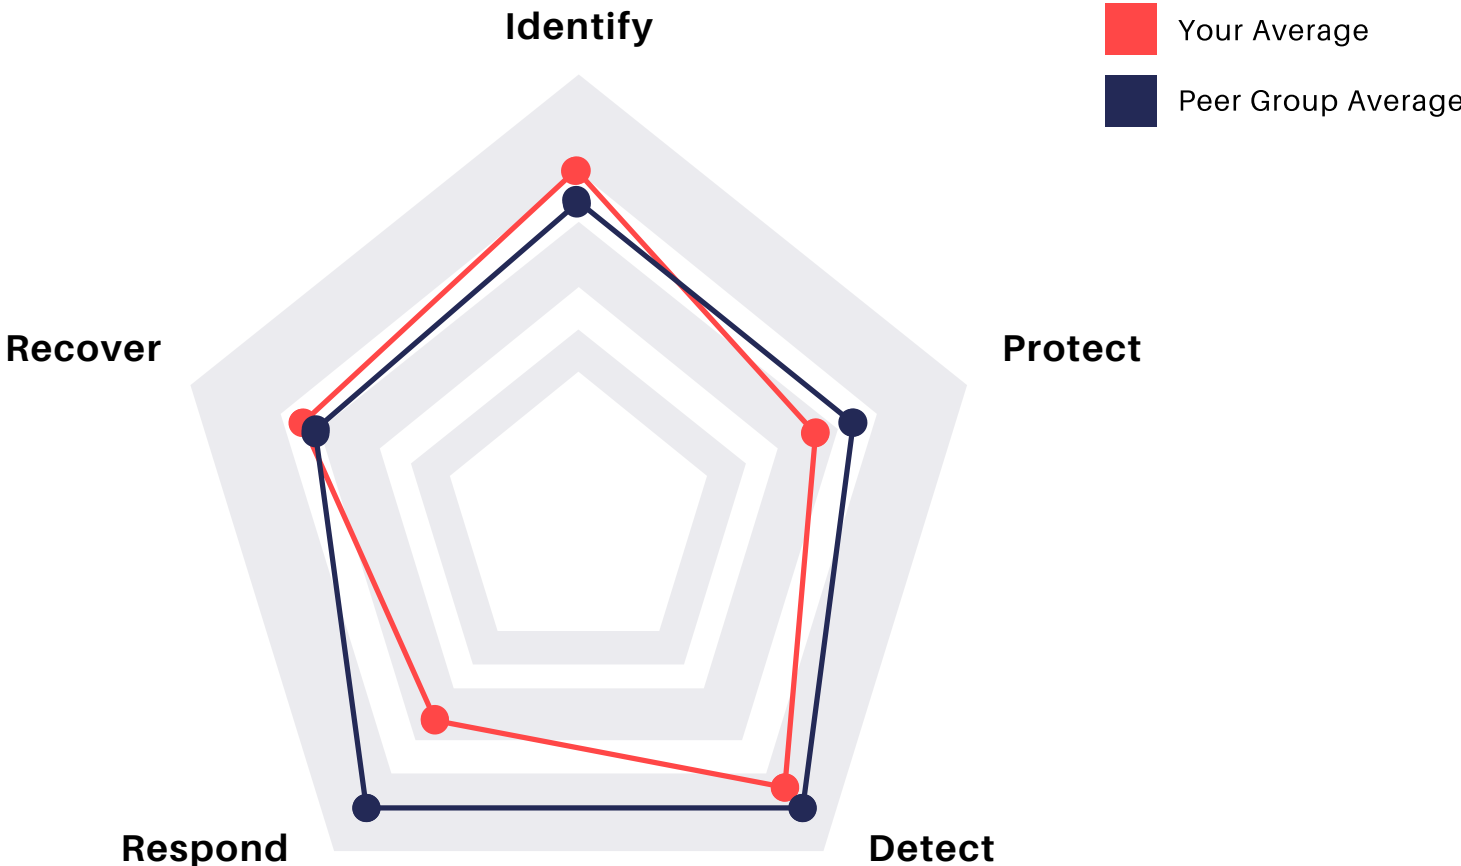

7

SI: Security Monitoring and Improvement

8

Industry Peer Benchmarking

We will create a detailed benchmarking representation of where you stand as compared to industry peers, making improvement opportunities and current wins evident. We will also accompany this data with detailed recommendations, further guiding you on your way to industry leadership.

Detailed Report

We will provide a detailed report of our findings across each of the 17 categories covering industry peer benchmarking, your program's strengths, weaknesses, overall maturity, in-depth improvement recommendations and much more.

Cybersecurity Maturity and Benchmarking Report

Roadmap

...

		Our Security Rating	Quartile	Peer Group Average	Our Comments
SG: Security Governance		2.28	2	2.68	
IR: Information Risk Assessment		1.24	1		
SM: Security Management		1.83			
PM: People Management					
IM: Information Management					

Roadmap

Top 5 in
your industry

Based on your current state, we will perform gap analysis and create a detailed strategic (6 months to 3 years) roadmap *to the top of your industry, complete with measurable KPIs, and a guided process at every step.

1

MONTH 2

Implement a Vulnerability Management program, define Crown Jewels

2

MONTH 4

Formulate a Cyber Incident Response Plan, create Playbooks and conduct training

3

MONTH 6

Establish a Cyber Threat Intelligence program, integrate Indicator tracking, implement IAM controls

4

MONTH 8

Formalize 3rd Party Risk Management approach, conduct Attack Surface Management sessions

5

MONTH 10

Refine Privacy and Data Protection controls, integrate with IT and cyber programs, introduce KPIs

6

MONTH 12

Update Incident Response plan, establish an in-house Security Operations Center or enroll in MDR

* This is a very high-level representation of an actual roadmap

What our clients say...

Martin Boze

Chief Operating Officer

“

We've been following COBIT5 for some time now but were lacking across detection and response capabilities. Wembley Partners helped us form a holistic view of our cybersecurity program as compared to industry peers, and then accompanied us during implementation efforts as well. As a result, we were able to build a solid foundation for hitting next year's risk mitigation targets and avoided a major malware incident.

”

Our Story

Wembley

Partners

Going to market since late 2019 and led by a global Board of industry professionals with over 160 years of expertise combined, Wembley Partners set out to become the world leader in Security Intelligence, Cyber Incident Management, and Assessment products and services for small to medium-size businesses. Recognized by NCSC as an Industry 100 company, Wembley Partners delivered over \$280,000,000 in value to its clients in under 2 years.
